Overseas Education College (OEC) is designed to provide professional service to educational consulting companies, business firms and agencies from across the globe.

We are currently working with thousands of universities in all continents, by rendering professional assistance to partnered Universities/Colleges, for the processing of admissions of partnered international agency's student.

Students from all over the world are increasing annually and the academic dreams of some are to study in a stable and diverse community. Service is highly needed to provide help for students by assisting them with all the necessary admission process.

OEC is here for a win-win business module as our primary aim is to serve you and create a better world of educational technology.

OEC PARTNERS

...Connecting the world through Educational Technology

I have already been a big believer in OEC partnerships: the idea of having - for those entrepreneurs that might benefit from a bit of extra support - having those offers scale up a bit. I believed in it before; I absolutely believe in it now. So that is probably one of the things that affirmed something I already supported.

Creating a better world requires teamwork, partnerships, and collaboration, as we need an entire army of companies to work together to build a better world within the next few decades. This means corporations must embrace the benefits of cooperating with one another.

For me, it's important to build good partnerships rather than score centuries. Once, you have those partnerships, you will also get centuries.

It takes a government to set up public-private partnerships and develop university programmes. I think this is the best path for the world, given the rapid progress the country has already made and given the rapid progress we all hope India will continue to make.

My role at educational consultancy puts me in contact with extraordinary leaders in many fields - from science & engineering to philanthropy and government. Since we also work closely with our nation's ministry of education, we tend to reflect a lot on leadership & how we can inspire successful teamwork, cooperation, and partnerships.

OEC PARTNERS

...Connecting the world through Educational Technology

Yes, there are absolutely moments when you're running out of ideas, and you do genuinely feel sorry for the bowlers when you keep asking them to run in again on a flat wicket, when partnerships get away from you, especially at the tail, which is one of the big differences in the modern game.

Limited partnerships are required to amend their filings whenever important changes, such as the admission of new partners, take place.

I love creating partnerships; I love not having to bear the entire burden of the creative storytelling, and when I have unions like with partners, it's really great; not only do I benefit, but the project is better for it.

I left from being solo for the non-profit sector because it was clear to me that only public/private partnerships can pull off a turnaround plan at the scale we need to tackle global poverty.

Getting recognized and doing shoots and signing on partnerships and signing on deals, that's all great, and I'm so appreciative of that, but it's more the reward that's the most satisfying. I know the importance of working hard, and I appreciate pretty much everything that has come my way; I don't take any of it for granted.

OEC PARTNERS

...Connecting the world through Educational Technology

The will to win, the desire to succeed, the urge to reach your full potential... these are the keys that will unlock the door to personal excellence.

It doesn't matter how many runs one person puts together. We want to get partnerships and get 400 runs on the board. One person can't get 400 runs on the board if there is nobody at the other end.

An entrepreneur needs to know what they need, period. Then they need to find an investor who can build off whatever their weaknesses are - whether that's through money, strategic partnerships or knowledge.

System-wide changes rely on a critical mass of interested parties, all willing to enter into deep partnerships and collaborations, founded on new levels of trust and a commitment to action, not debate.

Do the difficult things while they are easy and do the great things while they are small. A journey of a thousand miles must begin with a single step.

OEC PARTNERS

...Connecting the world through Educational Technology

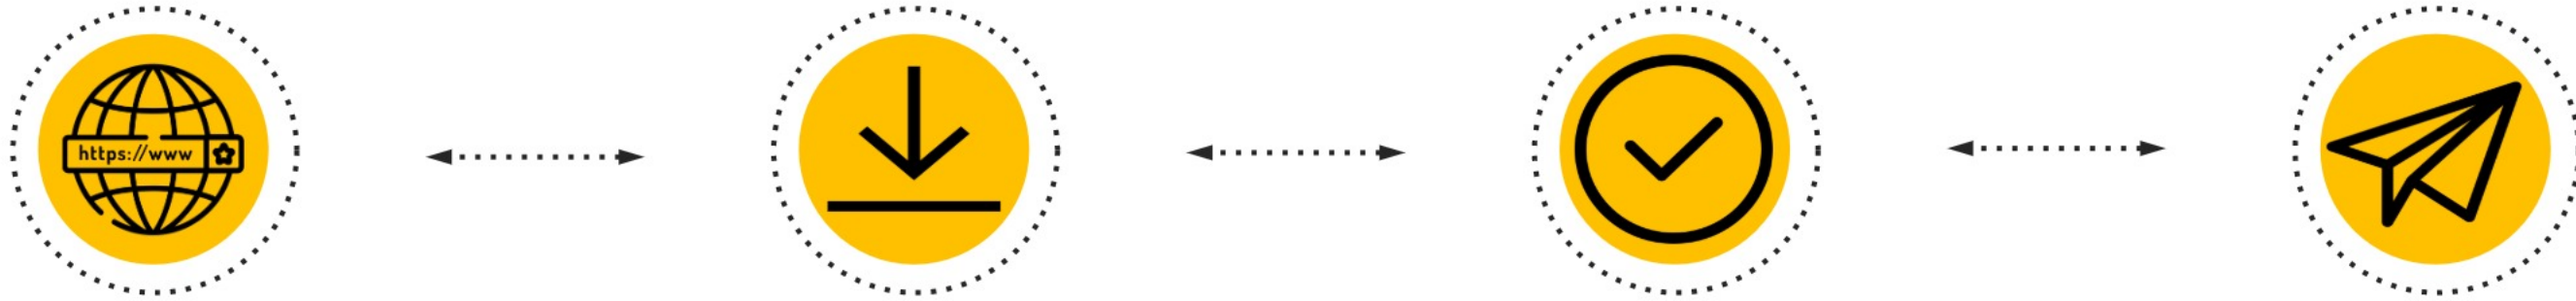

Optimism is the faith that leads to achievement. Nothing can be done without hope and confidence.

If you want to succeed, you should strike out on new paths, rather than travel the worn paths of accepted success.

Hearst makes smart investments and partnerships across important industries, and DEIL Group is the perfect opportunity to highlight the amazing innovations coming out of all of those brands.

Partnerships are not just about bowling in tandem all the time. It all is about helping the other guy get in the right frame of mind.

Perfect partners don't exist. Perfect conditions exist for a limited time in which partnerships express themselves best.
